

## Cloud Architecture & Migration

Implementing scalable and elastic IT services across your organization will enable you to maximize the utilization of your existing IT investments across the board, while drastically decreasing your IT costs.

### Infrastructure Automation

Whether a public cloud, private cloud, or some hybrid of the two suits your organizational needs best, iConsult can help you:

- ✓ Develop a common sense roadmap to incrementally migrate the right IT resources to the cloud;
- ✓ Instrument the right governance and control for efficient service and operations for your internal customers, agency partners, and key stakeholders; and
- ✓ Plan and implement the necessary disaster recovery & continuity of operations procedures.

### Architecture Modernization

Obsolete legacy applications can be difficult and costly to maintain, inefficient for operations, and vulnerable to security risks. iConsult can help you update outdated technology and migrate obsolete technology to current technology platforms, thereby extending the life of your existing investments where possible and decreasing ongoing costs and risk to the organization.

## iConsult

iConsult's broad and deep expertise stems from over 40 man-years of helping organizations, both government and industry, implement strategic programs to achieve their goals.
